SUMMARY

I am a motivated software developer with over 2 years of experience building web applications using various technologies. My experience includes projects in augmented reality and REST API development. I am passionate about ai and always eager to learn new things.

SKILLS

Django	Python	Docker	Ec2	React
Django Rest Framework	JavaScript	Celery	S3	Next.js
PostgreSQL	HTML & CSS	Redis	RDS	Redux

PROJECTS

E-Commerce Store

Built a feature-rich e-commerce platform with functionalities such as a robust shopping cart system, secure user authentication, and an intuitive orders admin panel. Implemented using state-of-the-art technologies for seamless performance and scalability.

Python Challenges

A comprehensive learning platform for mastering Python programming through tutorials, lessons, and coding challenges. Engage with interactive content, track your progress, and collaborate with a community of learners.

Modern Restaurant

Transforming dining experiences with a modernized restaurant system. Streamlining order management, optimizing inventory, and elevating customer interactions. Owners benefit from hassle-free menu customization via the admin panel.
